PROFESSIONAL SUMMARY

Computer Science graduate and Full-Stack Developer with hands-on experience building modern web applications using React.js, Java, Spring Boot, Node.js, and RESTful APIs. Proficient in developing responsive frontend interfaces, scalable backend services, database-driven applications, and secure authentication systems. Experienced in building real-world projects including e-commerce, restaurant management, hospital management, and AI-powered applications using RAG and LLM technologies. Strong problem-solving skills with a passion for learning new technologies and developing reliable, user-focused software solutions.

TECHNICAL SKILLS

Languages & Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap
Backend: Java, Spring Boot, Spring Security, JWT, Authentication, Authorization, RESTful APIs
Databases & Storage: MySQL, MongoDB, Cloudinary
Tools & Other: Git, GitHub, AI/LLM, Prompt Engineering, RAG

PROJECTS

AI Powered E-Commerce Application

- Built a full-stack e-commerce platform with user registration & login, product search, category-wise filtering, and a complete shopping cart and order placement flow.
- Implemented a payment submission system where users upload Easypaisa or JazzCash payment screenshots, which admins verify and use to update order payment status.
- Developed a full admin panel to add, update, delete, and view all products, plus an admin dashboard displaying sales, revenue, and profit through interactive graphs.
- Integrated an AI-powered chatbot using LLMs, Prompt Engineering, and RAG (Retrieval-Augmented Generation) to answer user questions about the website for a better customer experience.

Tech Stack: *React.js, Node.js, Express.js, MongoDB, Cloudinary*

Restaurant Management System

- Developed a responsive restaurant ordering platform with user registration & login, food search, and category-based filtering of menu items.
- Built shopping cart and order placement functionality along with a payment submission system using Easypaisa/JazzCash screenshots, verified by the admin to update payment status.
- Created an admin panel enabling admins to add, update, delete, and view all food products.

Tech Stack: *React.js, Spring Boot, MongoDB, Cloudinary*

Hospital Management System

- Designed a hospital management platform with user registration & login, doctor listings with filters, and search functionality.
- Implemented user appointment scheduling, with admin-side appointment handling and automated email confirmation sent to users after booking.
- Added a payment submission system via Easypaisa/JazzCash screenshots, verified by the admin panel, along with admin capability to add, update, and delete doctors.

Tech Stack: *React.js, Spring Boot, MongoDB, Cloudinary*

Smart Contact Manager

- Designed and implemented a Smart Contact Manager system with user authentication and features to add, update, and delete contacts using Thymeleaf, HTML, CSS, Bootstrap, MySQL, and Spring Boot.

Additional Contributions

- Created RESTful APIs and integrated frontend applications with backend services.

- Used Git & GitHub for version control and collaborative project management.

EDUCATION

BS Computer Science — UET Peshawar 2022 – 2026

FSC Pre-Engineering — Govt. College Jalozai 2020 – 2022

LANGUAGES

English, Urdu
